

# T/7i

## Balance Point

### T/7i, The Perfect Blend

T/7i is, without reservation, one of the most-balanced RELs of all time. In order to achieve perfect balance, a sub must weigh speed against heft, while ensuring true extension-depth-and do so in a physically harmonious package. T/7i manages to make it all seem easy. Quick and delicate for a perfect blend, it can pound out exceptionally deep, tuneful bass that belies its size and plays louder than most will ever require.

## Simply Faster

### Experience A Better Engine

The new composite alloy/fibre engine in T/7i blends precisely the correct dimension of stiffening alloy with a fibre material chosen for its sonic neutrality and light weight. The combination is brilliant; exceeding the performance of competitors' drivers that are many times more expensive. The forward-firing 8" active couples with a larger 10" down-firing passive, again with carefully chosen balances of alloy to fibre and the result is seamless, effortlessly deep bass that blends perfectly with the main speakers.

## Brains and Brawn

### The Power Behind REL

If our driver designers deliver the structure of REL's sound, the electronics are the brains and the power behind our success. Serie T/i uses the same Class A/B power amplifier sections with large, high current power supplies, precision-wound toroidal transformers and an amazing reliability record that has powered almost 100,000 RELs.

## Zero Compression Wireless

### Introducing Arrow™

Arrow™ is REL's latest generation of zero compression wireless. Super fast delivery of both High Level Bass and .1/ LFE ensures the rich, natural warmth that only RELs can deliver. With a throw distance of some 45'(13.7M) Arrow permits flexible placement without sacrificing sound quality.

Arrow™ separat erhältlich
