

T/9i

The Most T/i Available

The Powerful T/9i

REL have a longstanding tradition of requiring the top model in any range to be *more*. More than the sum of its parts, it represents the grandest scale, the highest output and the most we can do within any given technology envelope.

T/9i represents the most of T/i that we can deliver, and if sheer output alone is a primary requirement for your theatre or music system then read no further. The combination of a lightweight, composite 10" driver coupled to a matching 10" T/i passive delivers speed, slam and attack when called upon but also is capable of tracing more delicate passages when necessary. Large in sonic scale, the T/9i is ideal for mating up with floor standing speakers and rooms that are on the medium-to-large size. Powerful, concussive, yet beautiful.

Hochglanz weiß

Reimagined, Then Reengineered

A completely redesigned flagship

T/9i delivers more than just raw output. We started with our driver upgrades and built outward. The lovely cabinets grew by 4 lbs. (1.8 kg) over its predecessor due to thicker cabinet walls and improved bracing. Why? Because the additional speed and impact of the new drivers requires greater control or the benefits can be lost before they get to the listener.

Great Subs, Great Amps

The Brains Behind the Brawn

REL's acclaimed input filters and robust amplifiers result in some of the best sounding, most reliable designs ever produced. High current power supplies, huge toroidal transformers, and what many critics call the best filters in the world produce the famous REL Effect—wherein not simply the bass region but ALL music and movie sound is uplifted and improved.

Zero Compression Wireless

Introducing Arrow™

Arrow™ Zero Compression Wireless: REL are quickly growing into an industry leader in wireless. Following on the heels of the acclaimed LongBow™ Wireless, Arrow delivers much of the promise and connectivity of hardwired RELs with the placement flexibility and pure cool factor of great wireless for all of T/i. For a reasonable sum, Arrow gives you the ability to place subs in distant corners, along glass walls, or on hardwood floors where a cable would otherwise destroy the effect.
