

THE SNOWLINE (HALOGEN FREE)

The design aim of The SNOWLINE was to produce a very affordable twin lead loudspeaker cable with a good sonic quality despite its low price.

- The SNOWLINE is made of 2 conductor groups, each with 98 x 0.16 mm. strands.
- The total cross-section area per conductor is 1.97 mm²; close to AWG 14.
- The conductor material is a very high grade large crystal OFC with a dense pure silver coating.
- The resistance per lead is 0.88 Ohm/100 meter.
- The external dimensions are 8.5 x 3.4 mm.
- The white jacket is made of HULLIFLEX® 3, a superior insulation material exhibiting a very good mechanical protection and a high chemical stability.
- The two conductors have different insulator shapes: one is round and the other has two edges with type printing on the flat surface: the most simple polarity finder you can think of.

THE SNOWLINE (HALOGEN FREE)

material	Silverplated Copper OFC
product category	car hifi - Speaker cable
product category	speaker cable - Twin-lead, Entry-level
cable type	Twin conductor
conductor material	High purity dense Silver coated high purity OFC
design purpose	Loudspeaker cable / Car and general hi-fi applications
eff conductor	2x(1.97 mm ² / ~AWG 14 / 98)
external diameter	8.5 mm. wide; 3.4 mm. thick
jacket colors	White
resistance	0.88 Ohm/100 m.
capacitance	69 pF/m.
insulation	Jacket: HULLIFLEX® 3 / 300 Vrms min.
connector types	Our 3.0 mm. Ø cable entrance diameter Bus type Universal Speaker Connectors or our 4.5 mm. Ø cable entrance diameter BERRI Bus Connectors or our DIY Screw-On Speaker Connectors; All custom mountable on ordered lengths.
standard sales units	100 m. reels; With connectors mounted to specifications: any length; Without connectors: please consult your van den Hul dealer or the van den Hul distributor in your country.
remarks	Our The SNOWTRACK is a quadruple lead / bi-wiring version of this cable. Our CS - 14 is a single lead version of this cable. Other twin-lead speaker cables in our AWG 14 range are: The CLEARLINE, The SKYLINE HYBRID, The BRIDGE, The CLEARWATER and The GOLDWATER.
