Flat Fixed Frame Screen with DecorMask

# FDM

## Flat Fixed Frame Screen with DecorMask Supreme 1-Way Top

This new DecorMask screen model from Screen Research has been created to offer a more price affordable solution than the existing one from our X-Mask Reference series, allowing a larger number of customers to enjoy a beautiful artwork decorating their living space or dedicated room and an amazing projection screen, at the same time!

The FDM flat fixed frame screen combines a 1-way top masking system with our DecorMask option that gives the possibility to users to completely hide the projection surface when not in use with an image/picture of their choice, making the screen becoming a painting. The artwork chosen by customers is printed on our famous top class ClearPix acoustically transparent material. The planarity of the projection surface is guaranteed through the E-Grip fabric attachment system that ensures perfect and constant tensioning of the projection surface.

Suitable for luxury homes, executive suites or exclusive meeting rooms, the FDM screen model represents a unique value product with unrivaled quality and great style.

### Features

- > European manufacturing top grade quality
- > Luxury flock finish for the frame
