# TRIANGLE

MANUFACTURE ELECTROACOUSTIQUE

## Manufacture

### 40 YEARS OF PASSION

TRIANGLE consists of a team of enthusiastic engineers and technicians, who have developed, designed and assembled hifi speakers in France for more than 35 years. From the very first day, our focus has been on delivering a clear and detailed sound that enables the listener to fully enjoy all the emotional wealth of the greatest musical masterpieces.

TRIANGLE constantly develops and re-invents its products to offer music lovers a sound reproduction without compromise.

### FRENCH MANUFACTURE

Created in 1980 by Renaud de Vergnette in Soissons, TRIANGLE has proudly shown the world its passion for sound reproduction devices for the past 40 years.

With products manufactured in Soissons in Picardy, TRIANGLE legitimately claims to be Made in France.

## UNIQUE PRODUCTS

Since the very beginning, TRIANGLE has made technological research and innovation its principal priorities, with the aim of offering music-lovers a natural sound of the highest quality.

An enthusiastic team of engineers and technicians, constantly seeking to improve and innovate, are part of what makes TRIANGLE loudspeakers unique. Each component is designed, engineered and developed, according to technical innovations and solutions that are exclusive to TRIANGLE.

# Craftsmanship

## LUXURY HANDCRAFT

For the past 40 years, TRIANGLE has been designing and assembling its prestigious speakers in our workshop in Soissons. The team of engineers is working closely with production, thus ensuring unparalleled manufacturing quality and compliance with very precise and detailed specifications.

TRIANGLE's traditional craftsmanship is based on our employees' long experience, some of whom have been with the company for more than 35 years. The different components are controlled and carefully assembled, to achieve the utmost finish and acoustic quality.

## DRIVER CRAFT

The high-end transducers assembled in our workshop in Soissons are controlled at each production stage to meet TRIANGLE quality requirements.

Many measurements and controls are done to detect any imperfections: centering control, coil positioning, hearing test for noise, and final control by CLIO of the frequency response curve and impedance.

All these tests guarantee a high level of quality and a very limited dispersion between the drivers.

## ASSEMBLY OF THE SPEAKERS

The parts are manufactured and assembled with millimeter precision to offer an irreproachable finish and acoustics.

## CONTROL & QUALITY

Numerous acoustic tests are carried out throughout the process to ensure the compliance of each component.

Each speaker is tested in the anechoic chamber, a sample is then taken and listened to in the auditorium.

# Acoustic expertise

## SOUND ENHANCING TECHNOLOGY

TRIANGLE continuously invests in the latest technology to innovate and improve its acoustic expertise. A Klippel system is used to conceive and simulate the loudspeakers.

Modern prototyping tools, 3D printers, the latest CAD software, as well as MLSSA and CLIO measuring systems, enable the company to put theory into practice.

## CONCEPTION

In the quest for innovation, the R&D team of TRIANGLE has developed new components. Each aspect of this 40<sup>th</sup> Anniversary Edition is the result of a careful optimization effort. Nothing has been left to chance, for a single purpose: sharing emotions.

## DESIGN

Multiple and long researches on the materials to be used and the finishes to be combined make it possible to offer our ranges a timeless and modern aesthetic at the same time.

Meticulous work to offer a noble and unique product expressing the TRIANGLE character.

## SERIOUS ACOUSTIC CHECKING

Numerous acoustic tests are carried out throughout the process to ensure the compliance of each component. Each speaker is tested in the anechoic chamber, a sample is then taken and listened to in the auditorium.

# Our sound signature

## THE PURSUIT OF LIVE SOUND

TRIANGLE sound is built on a decision to develop « high performing » speakers to share the emotion of live performance.

### Dynamic

Our horn-loaded tweeter increases the overall efficiency of the speaker, thereby producing tremendous energy and vitality.

### Light

To create an excellent realism, as well as the finesse and details of each instrument, TRIANGLE uses light and resistant materials to maintain maximum information levels even at low volume.

### Fast & Accurate

The woofers are designed to assure that the bass driver moves quickly and precisely. The full control of the bass allows the medium to work freely.

# The secrets of Triangle sound

## HORNLOADED TWEETER

A real TRIANGLE trademark of technology and performance, the horn loaded tweeter uses a titanium dome in combination with a compression chamber. This technology provides high efficiency with low distortion and excellent directivity.

## MIDRANGE

TRIANGLE favours cellulose pulp membranes (paper) for the midrange drivers, due to the low weight and high rigidity. Combined with the small pleated suspensions, this assures low coloration, amazing accuracy and quality of voices.

## WOOFER

The woofers have a glass fiber membrane, with an inverted half-roll suspension, to assure the driver stops quickly and precisely. This technology prevents any unwanted resonance and produces top quality sound.

# Magellan

## THE ULTIMATE ACHIEVEMENT

Magellan is the jewel in the crown, a magnificent blend of TRIANGLE, craftsmanship, pure luxury and cutting edge technology.

The ambitious Magellan program represents five years of research, and a passionate non-compromising quest for perfection. It is a harmonious combination of fine materials and the latest technology, taking every detail to the utmost limit of perfection.

Magellan is a rare precision-piece, manufactured by expert hands, to be cherished and rediscovered every single day.

## The core of technology

### UNIQUE CABINET DESIGN

MAGELLAN enclosure went through an elaborate series of tests to make sure they are rigid enough to withstand the powerful vibrations generated by the woofers at high volume levels. We took great care in rigidifying our enclosures, basing the design on exhaustive measurements by means of laser-beam accelerometer. As a result we can eliminate almost all of the unwanted vibrations while controlling the structural behavior of the enclosures themselves.

### LHS2

This system consists of a heat sink ring in contact with the back of the yoke – the heat conduction ring. This ring collects heat dissipated from the core and the yoke and brings it to a finned cover. It results an increase in power handling capacity to 200 Watts RMS per woofer. This effective heat dissipation system protects from any risks of thermal runaway improving greatly the overall drivers performance. We recorded a difference of 20° on average over 120 minutes, with a pink noise registered at 100 watts and filtered with high pass at 80Hz.

### RPC

### REGULATED PHASE CROSSOVER

The crossover was designed primarily to give the final product the best possible musical characteristics. What makes MAGELLAN line unique is modeling the crossover characteristics to those of the drivers in order to achieve a very steep cut-off and an excellent phasing.

The drivers' impedances were linearized for more efficient performance between the amplifier and speaker. This modified impedance acts almost as a pure resistance, allowing the amplifier to work very efficiently. The TRIANGLE RPC system provides a reduction in both phase distortion as well as speaker directivity. As a result, the position of the listener will have little effect on the listening experience.

# Signature

## THE ART OF SOUND WITH A FRENCH TOUCH

The Signature range is the result of the hard work and expertise of the TRIANGLE craftsmen.

Each speaker is a form of luxury craftsmanship, made and assembled with uncompromised precision, in view of achieving crafted perfection and irreproachable sound.

Benefiting greatly from the R&D carried out for the development of the Magellan range, SIGNATURE combines the finest woodwork with TRIANGLE's acoustic expertise.

## Exclusive technologies by TRIANGLE

### SEMI POD-MOUNTED TWEETER

TRIANGLE first used the pod-mounted tweeter when the company designed the CX2 speaker back in 1981.

TRIANGLE is updating this technology, which features a semi pod-mounted tweeter. This positioning feature guarantees balanced control of both resonance from the front of the cabinet and diffraction caused by changes in the cabinet's shape.

This assures a more transparent, open, and richer listening experience. The sound elements are more detailed, accurate and the result is an amazing three-dimensional combination..

### TWIN VENT : SOLID BASS

What makes the Twin Vent original is that it discharges through a single vent the rear sound waves created by the bass drivers. This system ensures that each driver is completely isolated.

Increasing the volume of the sound does not disrupt the tonal balance; the only remaining distortion limit is the driver's mechanical characteristics. The results in terms of power handling are amazing. The listening experience offers dynamic, solid, well-sustained bass.

### **SPEC:** SINGLE POINT ENERGY CONDUCTOR

The Spec (Single point energy conductor) is a brushed steel point. Like the cello, it evacuates part of the mechanical energy towards the floor, thus improving sound quality.

Cabinet vibration is kept to the minimum and has little effect on sound reproduction. TRIANGLE's attention to detail makes all the difference.

TRIANGLE

# 40<sup>TH</sup> ANNIVERSARY

## THE TRIANGLE LEGACY

In 1980, Renaud De Vergnette, passionate about art and music, developed in his modest workshop an innovative loudspeaker, the 1180. Bold new achievements, filled with technological innovations, slowly enabled TRIANGLE to really shine in the French high-fidelity sector.

40 years later, a limited "Anniversary" edition of two iconic models celebrates the history and know-how of TRIANGLE.

Entirely redesigned and improved, the mythical speakers Antal & Comète feature the latest acoustic innovations from the R&D department. Between legacy and perpetual quest for innovation, this 40<sup>th</sup> Anniversary Limited Edition embodies the philosophy of TRIANGLE.

# 40<sup>TH</sup> ANNIVERSARY

## Exclusive technologies by Triangle

### NEW MAGNESIUM DOME

The horn-loaded tweeter TRIANGLE is known for uses a metal dome in combination with a compression chamber.

In this 40<sup>th</sup> Anniversary Series, the unprecedented use of a composite dome in rose gold anodized magnesium, offers the tweeter high efficiency, controlled distortion, and excellent directivity. Magnesium combines two desired qualities: lightness and rigidity. The dome is designed specifically to support the coil, ensuring even and homogeneous alignment. This design also offers high consistency during production.

### BASS DRIVERS

Providing a significant performance upgrade, the Antal 40<sup>th</sup> incorporates a new generation of bass drivers for high impact and musicality.

The extremely rigid membrane is a unique composition of two types of wood pulp coupled with flax combined with carbon fiber, limiting distortion despite its long throw. The driver has a generously sized engine, ensuring excellent control and great sharpness. The Antal 40<sup>th</sup> delivers deep bass, with a clean and detailed sound.

### DEDICATED SPEAKER STANDS

Each speaker has two sets of decoupling spikes: the first one in rose gold aluminum, adjustable in height and provided with lock nuts for surfaces like carpets, and the second one in rubber for more rigid surfaces.

These accessories enable decoupling by significantly reducing the transmission of unwanted vibrations to the floor, thus improving the listening experience.

The S04 40<sup>th</sup> Anniversary speaker stand will be perfect for the Comète 40<sup>th</sup> speakers. The speaker can be screwed to the stand for more rigidity.

# ESPRIT EZ

## DESIGN, MUSICALITY & ENJOYMENT

ESPRIT Ez is the genuine materialization of TRIANGLE's philosophy: it offers music lovers an uncompromising, dynamic and living sound, which conveys all the finesse and beauty of any musical composition.

It features a sleek design that compliments the excellent sound. The loudspeakers' clean and sharp lines are underscored by aluminum trims with concealed screws. The floorstanders sit on a glass pedestal with adaptable spikes. The ESPRIT EZ speakers are desirable and aesthetic objects that blend perfectly into your home environment.

# AUSTRALE EZ

## The innovation of the Esprit range

### **DPS**

#### **DYNAMIC PULSE SYSTEM TECHNOLOGY**

Australe EZ integrates a second tweeter at the rear of the speaker, expressing the most high frequencies without interfering with the signal emitted from the front of the speaker.

DPS technology improves the imaging and reduces directivity by providing an almost holographic restitution of the soundstage. The spot of the listener in relation to the speaker is therefore less critical. He can thus fully enjoy an unforgettable musical experience, and this anywhere in the room.

### **MIDRANGE DRIVER : NATURAL CELLULOSE PAPER CONE**

Made out of 100% natural cellulose paper, white membrane is used to avoid any coloration. It is combined with a small pleat peripheral suspension to increase the emissive surface area. Special attention has been paid to a number of details in the development of the midrange: the profile of the membrane, the shape of the suspension, and the new dust cap, are directly inspired from the MAGELLAN project.

### **NEW GENERATION OF WOOFERS**

Australe Ez is the first model featuring the new generation of woofer. Its membrane uses a new composite material, made of wood pulp and carbon fiber, which has the property of guaranteeing high rigidity and low mass for fast and powerful bass. A motor made of an oversized ferrite and voice coil feeds the membrane, allowing it to go down to 29Hz. The woofer restores an intense bass that provides a real physical impact of low frequencies.

TRIANGLE

# BOREA

## HIGH FIDELITY FOR ALL

With Borea, access the Triangle universe with a limited budget, while maintaining quality and acoustic performance.

Directly inspired by Esprit Ez, it integrates the best of previous developments and bring innovative breakthrough in terms of acoustics and engineering.

Its clean and elegant design with no screws and magnetic grills makes Borea speaker an incredible value for money on both acoustics and aesthetics.

# BOREA

## A complete home theater solution

### VERSATILITY : MUSIC & HOME THEATER

The sonic realism and detail, emblematic of the TRIANGLE sound, give the Borea speakers great versatility. They are perfect for both listening to music or in a home theater system.

The range consists of 3 models of floorstanders (BR07, BR08 & BR09), 2 models of bookshelf speakers (BR02 & BR03) and a center channel (BRC1). You can set up the most efficient systems ranging from 2.0 to 9.2.2.

### SURROUND SPEAKER

The Borea BRA1 speaker is the ideal complement to a stereo installation to bring home cinema sessions to life at home. It is a discreet and versatile speaker designed to fit into all types of Home Cinema composition. Thanks to a sound filter with 2 positions, it can be positioned directly at the top of the column speakers of the range as a front effect speaker. Or as a surround effect speaker by placing yourself on the walls.

The BRA1 effects speakers feature speakers facing the ceiling for better diffusion of sound wave reflective effects. They are equipped with a 24mm silk dome tweeter, a 16cm paper cellulose midrange.

### EISA AWARD 2020-2021

« BEST BUY HOME THEATER SPEAKER SYSTEM »

BOREA range awarded the prestigious EISA prize. The range is acclaimed for its excellent acoustic performance, its tone accuracy, and the excellent value for money it offers.

# THE AIO UNIVERSE

## Music and speakers, at your fingertips

Whether it is stereo speakers with the AIO TWIN, an all-in-one speaker with the AIO3 or a traditional Hi-Fi system with the AIO C, control all your musical devices with a single dedicated application. Create an AIO environment so you can listen to your favorite music throughout your home or stream different music in different rooms.

Enjoy high quality digital music and easy connectivity with Bluetooth aptX. the Wi-Fi technology, allowing you to stream your songs in high-resolution (24 bits / 192 kHz) and ensuring optimal quality.

# AIO TWIN

An all-in-one, modern Hi-Fi system

## ILLIMITED MUSIC IN HIGH RESOLUTION

Stream your music in high-resolution from your smartphone or tablet. Enjoy your favorite artists, radios, shows and podcasts, thanks to the wide panel of streaming services available.

Use the Deezer & Spotify platforms, famous for their extensive music catalogue, or Qobuz & Tidal, renowned for their high-resolution libraries. Not to forget the unlimited access to all the internet radio stations around the world via TuneIn.

## VERSATILITY

The AIO TWIN is a pair of active connected speakers in a sleek design, with a rich and detailed sound. Thanks to the integrated Phono preamplifier MM, connect your turntable directly to the speakers and listen to your 33 & 45 rpm records, seamlessly. Connect your flat screen TV to your AIO TWIN speakers using the dedicated optical-S/PDIF input and enjoy stereo sound in Hi-Fi quality.

## BEAUTIFUL DESIGN & MATERIALS

For several years, TRIANGLE has been partnering with the brand Gabriel to manufacture its grilles. True “fabric architect”, Gabriel offers nice pallets of colorful and textured finishes.

The grille of the AIO TWIN was crafted in the “Bond” textile, a premium fabric with a unique look, in harmony with the different finishes of the woodwork. Its oblong shape makes the AIO TWIN a unique decorative and design item.

# SECRET

## TRIANGLE SOUND IN ALL ITS ELEGANCE

SECRET is a range of in-ceiling and in-wall speakers intended for both houses and larger structures (premises, professional buildings).

The SECRET speakers deliver TRIANGLE sound within any interior with a minimal visual impact and a seamless integration. SECRET is the result of the latest research in acoustics carried out on high-fidelity speakers to transpose the distinct lively and crisp sound of the TRIANGLE speakers.

The design of these speakers provides versatility and freedom of use thanks to their wide spectrum of sound and easy mounting.

## “EASY MOUNTING” TECHNOLOGY

A patented technology, elaborated by Triangle together with its partner specialised in composite materials, offers a unique and innovative set-up system. A simple manual rotation is enough to snap the mounting system into position. You can then lock the speaker placement and fully enjoy the high-quality sound it delivers.

An innovative technology is available on the EMT7 for a simple, intelligent mounting system made easy, without tools.

## QUICK AND EASY SETTINGS

The EMT7 speaker offers different possibilities of sound settings based on its placement, location, and type of application.

Its adjustable tweeter fosters a precise sound adjustment, thus making it possible to focus on the listening position. Its low and high frequency levels can be adjusted in 3 positions. (-2 and -4dB)

The EMT7 features a high sensitivity of 90dB with a maximum power handling of 140W.

## MUSIC & HOME THEATER

Thanks to its frequency response covering a spectrum of 55 Hz to 20 kHz, the EMT7 offers great listening versatility: it will be ideal for music, including with the Atmos system of your installation, making any sound effects present when watching movies.

The EMT7 is a 2-way coaxial speaker. It is equipped with a 17cm midrange/bass driver with a polypropylene membrane, and a 25mm adjustable silk dome tweeter. The tweeter features a phase plug to extend the high-frequency response and to focus the waves towards the listener.

# SUBWOOFERS

## AT THE CENTER OF THE ACTION

The Triangle subwoofers enhance the delivery of the lower frequencies of your system. It offers you a deep and dynamic delivery of bass notes, perfectly expressing the power and energy of your movies and music.

Built on many years of Triangle expertise, these subwoofers successfully blend performance and compactness. Easy to integrate, they blend perfectly into your interior. Their implementation is straightforward. Once they are connected, you can feel the richness of the distinctive deep sounds, and focus on musicality above all, even through the most dynamic impacts.
